

Keck School of Medicine of USC

# Request For Applications

---

**UCLA AIDS Institute / UCLA CFAR /  
Keck School of Medicine of USC/ UCLA Pediatric AIDS Coalition  
are now accepting applications for the following:**

## **Basic and Translational Research**

The UCLA AIDS Institute/Center for AIDS Research (CFAR) are accepting applications for seed grants to fund basic and translational studies with special emphasis on collaborative and multi-disciplinary studies. The UCLA AI/CFAR, UCLA Pediatric AIDS Coalition and other private sources will fund these seed grants.

## **Clinical Therapeutics and Biomedical Prevention**

The UCLA AIDS Institute and Center for AIDS Research (CFAR) are accepting applications for seed grants to fund collaborative clinical studies relevant to HIV. Special consideration will be given to new investigators, high-risk, high-benefit projects and new research direction projects. These seed grants will be funded by the UCLA AI/CFAR and other private sources.

## **Prevention and Implementation Research**

The UCLA CFAR and UCLA AIDS Institute are accepting Letters of Intent for this seed grant proposal to fund behavioral science research. The objective is to provide pilot funding for projects that will eventually be submitted to NIH and private funders to fund larger grants.

## **International Research on HIV/AIDS**

The UCLA CFAR/AIDS Institute and UCLA Center for World Health are accepting seed grant proposals to fund global HIV prevention, clinical, and policy research. The objective is to provide pilot funding for projects that foster collaboration between UCLA and scientists from low- and middle-income countries, in order to stimulate HIV/AIDS research in these countries.

## **Biobehavioral Epidemiology and Substance Abuse**

The UCLA AIDS Institute and Center for AIDS Research (CFAR) are accepting applications for seed grants to fund studies relevant to HIV in the new program section of Biobehavioral Epidemiology and Substance Abuse. Special consideration will be given to new investigators, high-risk, high-benefit projects and new research direction projects. These seed grants will be funded by the UCLA AI/CFAR and other private sources.

## **Mentored Fellowship**

The UCLA AIDS Institute/Center for AIDS Research (CFAR) are accepting applications to fund fellowship supplements for postdoctoral and graduate students working in HIV/AIDS. These seed grants will be funded by the UCLA AI/CFAR and other private sources.

## **USC/UCLA Cross Campus Collaborative**

The UCLA Center for AIDS Research (CFAR), UCLA AIDS Institute and the Keck School of Medicine of USC, Department of Molecular Microbiology and Immunology are accepting Letters of Intent for seed grant proposals to encourage cross campus collaborations in one of the NIH High Priority Topics of HIV research. The goal of these grants is to encourage collaborations across campuses in order to facilitate development of preliminary data that will be leveraged for future submissions of program project applications or equivalent funding mechanisms.

## **Deadline for receipt of Letters of Intent: Monday October 2, 2017**

*Instructions for formal proposals will then be forwarded to applicants whose letters of intent are approved.  
Formal proposals will then be due on **Monday December 11, 2017***
